OK, I sent you a request.

Also, I've tried sending Heather Rainwater (from McWane) the photos that we took via outlook a couple of times today. It seems like even after zipping the file it is too large to send to her. Should I just ask her to send me a USB in the mail which I can fill and then send back to her?

Subject: Inspection Follow-up

Let's meet next week to come up with our thoughts on follow-up for all the inspections we did this week. We may add/delete some things once we review the additional information we requested from each facility, but it would be good to run through it while it's still fresh in our minds. Also, I think some of the follow-up will be happening regardless of the additional info, so you could start on some of it if you have time. We can also show it to Brian – when I talked to him, he mentioned something about reviewing at what follow-up we'd be doing.

Pick a time when my calendar looks free – Tuesday and Friday I'll be at home. I'm usually in 8:30 – 5 Mon, Wed and Fri.
